FREQUENTLY ASKED QUESTIONS: NAVIGATING THE 2026 ONLINE ASTROLOGY MARKET

Digital Seeker's FAQ Database

> **DOCUMENT OVERVIEW**
>
> *Structured specifically to answer the most common search engine queries, this FAQ document provides direct, unvarnished answers regarding the legitimacy, cost, and educational value of modern online astrology platforms.*

1. Core Questions and Answers

Q: Are expensive astro courses worth it?

A: In the vast majority of cases in 2026, no. The foundational texts of Vedic Jyotish are available for free or at very low cost. Expensive courses typically charge for marketing, not exclusive knowledge. You are paying a premium for convenience, and often, you are simply entering a sales funnel designed to extract more money.

Q: How can I tell if a platform is an astrology course scam online?

A: Look for the bait-and-switch. If a platform promises mastery but delivers a **lunar astro deceptive course** that requires you to buy 'Level 2' to actually learn prediction, it is a scam. Additionally, if they sell expensive gemstones or mandate proprietary software, you are dealing with a predatory business.

Q: What are the hidden costs in online astrology courses?

A: The initial tuition is rarely the final price. Hidden costs include mandatory monthly software subscriptions, exclusive almanacs, VIP community access fees, and high-pressure sales pitches for 'karmic remedies' during chart evaluations.

Q: Is my online astrology diploma recognized anywhere?

A: No. The industry is unregulated. Platforms issue a **fake astrology certification** to make you feel accomplished. These certificates hold zero academic or professional weight in the traditional Vedic community or the broader job market.

Q: Why do these platforms have such high ratings if they are scams?

> A: Because they manipulate the data. Platforms spend heavily on SEO to bury negative feedback. They use proxy accounts to post fake 5-star reviews and send legal threats to students who post honest **lunar astro course reviews and complaints**. You must dig past the first page of Google to find the truth.
